

Where will my profile be visible?

The profile you have created in CUORE is visible to users registered in CUORE and its local versions operated under different brands identified here under the heading «Our European dating brands».

This allows, for example, a user living near the border to know a user or a user of the local version of the service in the neighbouring country. These services are functionally identical and use the same centralized platform hosted in Spain. One of these services, Ourtime (and its local versions DisonsDemain and Zweisam), is specifically reserved for people over 50.

As a result, your profile will only be shown to these users if you are 50 years old or older and so you consent when registering. If this is the case, but you no longer want your profile to be visible to them, just uncheck the corresponding box in the «My Account Settings» section: Are you over 50? Maximize your chances of meeting people by letting their profile be visible to other members of our services reserved for people over 50. You may see some profiles of people over 50 registered with general services if their own account settings allow.
